

How to use your SD cards

- Only put the SD cards into a PC, Laptop or Mac with an SD card slot.
- Do not put cards into a camera, phone or TV as these are not usually able to read the file.
- Do not leave in direct sunlight or near anything that produces a magnetic field, as this may corrupt the card.
- All recordings are checked before being issued but copies are not kept, so please keep your cards safe.

Step 1. Place the smaller card inside the larger adaptor as shown below.

Step 2. Insert the card into the SD card slot on your computer as shown. Click on the file explorer find the Drive called 'SCHC (E:)'. Click on the folder named DCIM, and the next numbered folder. Your video is the file you see on the screen now, click to view.

Step 3. Enjoy your video, then swap over and repeat to view any other SD card videos.

If you have any issues with your video please call us on 01959 576 767

We hope you enjoyed your flight!
